

## Areas of Expertise

- Web Application Development
- HTML5 / CSS3 / JavaScript
- MVC & MVVM Architecture
- LAMP / WAMP Stacks
- MERN / MEAN Stacks
- ASP.NET/C#/SQL Server
- Node.js
- Responsive Design

### Frontend

- React / Angular
- Backbone
- jQuery
- LESS / SASS
- Bootstrap / Foundation

### Knowledge

- Object-Oriented Programming
- Test-Driven Development
- Agile (Scrum) Methodologies
- Waterfall Model
- Database Design, Query Optimization and Security

### Technologies

- Visual Studio
- Browser Development Tools
- PhpStorm
- Sublime Text 2+
- Git
- Vagrant / Puppet
- Adobe CC
- Microsoft Office
- WordPress

### Alternate Skills

- Graphic Design
- 3D Modeling and Texturing
- Music Composition and Performance
- Board game development and design.

## Personal Statement

My nine years of professional web development experience has brought in millions of dollars of revenue to clients all over the world. Many contributions to web development communities and freelance work for businesses demonstrate that I am a self-starter who works tirelessly to develop elegant and maintainable web-based solutions.

Since 1994 when I first ventured into computer science, I have been working to bring higher quality code to the web and staying up to date on current coding paradigms. Due to this experience and passion for software development, I am able to rapidly develop quality logic-intensive applications that are modern and maintainable.

If you are looking for a valuable addition to your company and are in need of a proficient full stack developer who can actively communicate well and can get things done promptly, then I would be an excellent addition to your team.

## Accomplishments Include

- Has successfully prototyped, developed, launched, and maintained applications in LAMP, WAMP, MERN, MEAN, and .NET MVC web stacks
- Promoted to senior software developer at Ballena Technologies developing web applications for high profile sports clients
- Successfully developed a series of IoT tutorials and applications on a number of microcontrollers for Microsoft's Build 2016 developer's conference

## Relevant Experience

### Software Development Consultant

---

#### Attunix

May 2015 – January 2017 (1 year 8 Months) Bellevue, WA

- Took over a vacant senior development position and became the established expert for the project within a month of starting
- Successfully launched a number of applications and tutorials for the 2016 Microsoft Build conference
- Worked with many local and remote teams to develop a variety of medium and large-scale applications in different tech stacks stored both locally and in the cloud

### Senior Software Developer

---

#### Ballena Technologies

May 2011 – June 2015 (4 years) Mill Creek, WA

- Develop web applications tailored to a variety of clients across international, professional, and college sports leagues
- Use version control (Git) and build processes to quickly collaborate and deploy projects that have been used by millions of our client's customers
- Extensive use of modern and reliable technologies and methodologies including Node.js (Bower, Grunt, Stylus), MVC frameworks, jQuery, Backbone and more

### Owner / Software Developer

---

#### David Bradbury LLC.

2007 – Present (9 years) Bothell, WA

- Successfully develop and launch websites for many local and remote businesses
